Summary

Profile: I am a junior full-stack developer with strong frontend expertise and solid backend fundamentals. Experienced in building responsive user interfaces with React, managing application state with Redux Toolkit, and developing backend logic with PHP and SQL. My portfolio showcases full-stack projects demonstrating real web application flows and integration of frontend and backend systems. I am seeking an internship or junior developer role to contribute to real-world projects while further developing my technical skills.

Education

- | | | |
|-----------|---|-----------------------|
| BS | Baku Higher Oil School , Information Security – Baku, Azerbaijan | Sept 2024 – present |
| • | Ranked among top 10 students in the major | |
| • | Coursework included networking, operating systems, programming, and application security fundamentals | |
| | | |
| | Physics, Mathematics and Informatics Lyceum – Baku, Azerbaijan | Sept 2021 – June 2024 |
| • | Strong foundation in mathematics, physics, and informatics | |
| • | Graduated with distinction | |

Certifications and Training

- | | |
|---|----------------------|
| DevOps Course – IDDA Digital LevelUp Program | Sept 2025 – Dec 2025 |
| • Linux fundamentals, CI/CD concepts, containerization basics, infrastructure workflows | |
| ITi Zəka Hackathon | Aug 2024 |
| • Second place winner | |
| • Team-based problem solving under time constraints | |
| Cyber Summer School – AKTA | July 2023 |
| • Practical exposure to web application security and networking labs | |
| Introduction to Front-End Development – Meta (Coursera) | May 2025 |
| • Learned core frontend concepts and basic JavaScript for web development | |
| Programming with JavaScript – Meta (Coursera) | May 2025 |
| • Practiced JavaScript fundamentals through exercises and small projects | |
| Advanced JavaScript Concepts – Packt (Coursera) | May 2025 |
| • ES6+ features, closures, promises, asynchronous programming | |
| Modern JavaScript with ES6 – Packt (Coursera) | May 2025 |
| • Modern JS syntax and advanced patterns for frontend development | |

Technical Skills

- Frontend Technologies:** HTML, CSS, Bootstrap, Tailwind CSS, JavaScript (ES6+), React, Vite, Redux, Responsive Web Design
- Backend Technologies:** PHP, Laravel, SQL, CRUD operations, REST APIs

DevOps & Tools: Linux CLI, Git, GitHub, CI/CD concepts, containerization basics

Application Security Awareness: Understanding request/response flow, basic web security risks (SQL injection, CSRF)

Productivity & Design: Microsoft Office (Word, Excel, PowerPoint, Access), Google Workspace, Canva design tools, presentation skills

Research & Analysis: Problem analysis, structured information gathering, debugging and testing practices

Projects ---

Guess.com Clone – Frontend (React)

E-commerce style frontend clone developed using React.

- Built responsive UI with reusable React components
- Implemented global state management using Redux Toolkit
- Focused on clean structure and maintainable code

University Debate Club Website – Frontend (React)

Frontend website for a university student organization.

- Designed and implemented responsive UI
- Integrated frontend with partially completed backend

Park Cinema Clone – Frontend (React)

UI-focused movie listing web application.

- Component-based React architecture
- Dynamic rendering of movie-related content
- Emphasis on layout consistency and usability

Papa John's Clone – Frontend (React)

Food ordering style frontend clone.

- Implemented product listing and ordering UI flows
- Practiced component composition and state handling

PHP Backend CRUD Project – Backend (Core PHP, SQL)

Backend-focused project using PHP and SQL.

- Implemented Create, Read, Update, and Delete operations
- Worked with server-side logic and database interactions
- Deployment planned as part of ongoing learning

Languages ---

Azerbaijani: Native

English: Advanced (IELTS 8.0)

Soft Skills ---

- Analytical and critical thinking
- Stress resilience and problem-solving
- Team collaboration and communication
